

This black and white photograph shows an archaeological excavation of a site. The ground is sandy and uneven, with numerous small, rounded stones and pebbles scattered across it. In the lower-left area, a CD-R disc is placed on the ground, showing its characteristic three-armed design. In the lower-right area, a small rectangular label is visible, containing the text 'CPG-89', 'ON CORTEX', 'A7-524', and 'E2 N2 L1'. Below the label, a scale bar with alternating black and white segments is laid out horizontally. The overall scene suggests a field investigation of a specific geological or archaeological feature.
